Bob

I am ok with disposing of the IDW and with repairing the gate at the Falcon Site

Thanks

Brian W Mueller RPM

**Subject:** IDW Sampling at Falcon Refinery

Brian:

We have several drums of soil cuttings and purge/decon water from the September field event stored at the site. We will need to sample this material to determine the appropriate disposal location. Typically, we will sample and dispose of the IDW after each major field event rather than allowing it to accumulate through the entire RI process. Unless you want us to wait until after the next field effort, we will sample the IDW during our site visit for the gate repair and well gauging.

Please let me know if this is acceptable.

Thank you,

Bob Owens
